

# Innovative cloud-based catering solutions

“Spoonfed has made our catering system for multiple locations incredibly efficient.

This has saved time for our team and created a more welcoming and hospitable experience for our guests”

## Core Application

- Manages hospitality, executive dining, event catering, and more
- Continually enhanced, exciting Product Roadmap

## Client Financial Control

- Create optional Approval pathways, and charge code validation

## Group Ordering

- Built for “today’s workplace” meetings
- Individually labelled deliveries and automated functionality for Admins

## Flexible Configurations

- For Accounts requiring a specialized touch
- On site menu and allergen management

## Order Flows

- Create additional online order flow for the Spoonfed Account. Service multiple catering options (e.g. Corporate and Retail) from the Spoonfed BoH.

## Spend Control

- Approvals features, charge code validation and automated departmental recharging.

## Event Management

- Detailed information on order processing, delivery, clear up etc. Order can be created BoH with subsequent customer online edits. Pulls through to comprehensive BEO form.

## Flexible Configurations

- For Accounts requiring a specialized touch
- On site menu and allergen management
- 

## Enterprise Application

- Managing and reporting on multiple Spoonfed Clients from a single Enterprise Account

## Marketplace Account

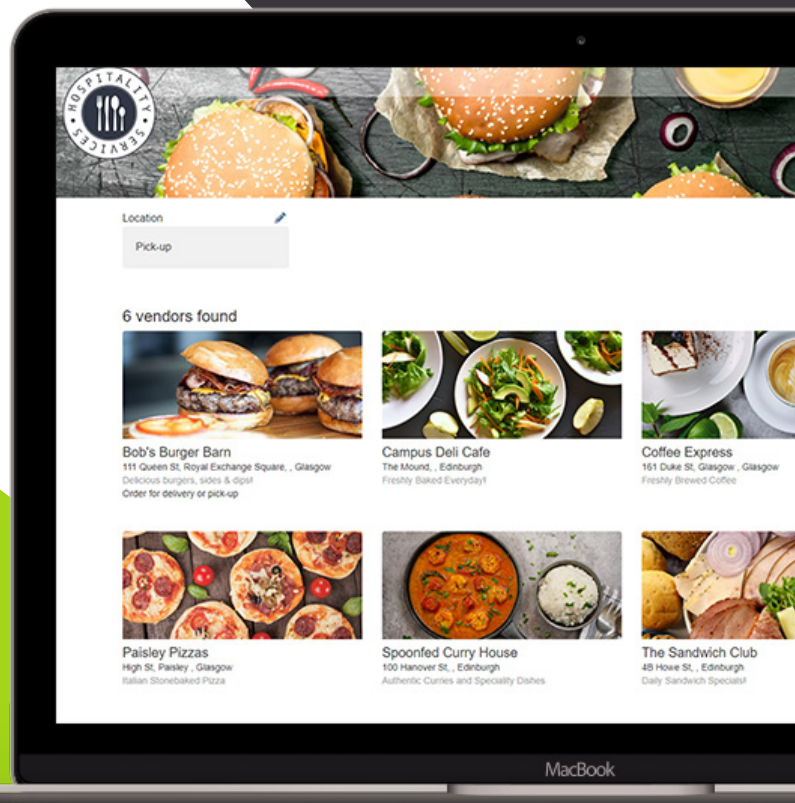

- Multiple brands/vendors servicing one or more locations
- Internal Marketplace – sub brands
- External Marketplace – management of external vendors for clients

“Embracing technology-based solutions like Spoonfed have helped us not only survive but thrive. The Spoonfed platform ultimately allowed us to extend our reach and drive revenue.”

LAURA FEHRLE, GARCES,  
GENERAL MANAGER
